Summary

Full Stack Developer with experience building web and mobile applications and deploying them on Linux servers. Skilled in configuring Nginx reverse proxies, DNS records, TLS certificates, and firewall rules, and in diagnosing production issues through server logs. Keen to develop expertise in networking and service operations within a structured engineering team, with strong communication skills for explaining technical issues to non-technical stakeholders.

Skills

Networking & Systems: TCP/IP, HTTP/HTTPS, DNS, SSH, SSL/TLS, WebSockets, Nginx (reverse proxy), Linux, Docker, ports and firewall basics
Programming Languages: JavaScript, TypeScript, Python, C++, SQL
Web & Mobile: React, Next.js, Node.js, Express.js, Django, React Native
Databases: PostgreSQL, MongoDB, Redis
Tools: Git, Linux command line, Postman

Education

Amity University Kolkata <i>Bachelor of Technology in Computer Science and Engineering - CGPA: 8.01 / 10</i>	Kolkata, India 2023 - 2027
East West Model School, Talit <i>Higher Secondary (ISC Board) - 85.4%</i> <i>Secondary (ICSE Board) - 85.67%</i>	Talit, India 2023 2021

Experience

Modern Mahal <i>Full Stack Developer Intern</i> - Developed an internal web application for a glass manufacturing business to record customer orders and track them through production stages. - Implemented role-based authentication for staff and admin users, along with an automated price quotation module. - Deployed the application on a Linux server with Nginx as a reverse proxy, configured DNS records for the domain, and enabled HTTPS using Let's Encrypt certificates.	Remote Jun 2026 - Jul 2026
Vayita Grow <i>Full Stack Developer Intern</i> - Developed a corporate website and internal management platform for an agricultural inputs manufacturing company. - Built modules for product listings, dealer and distributor inquiries, and client, order, statement, and field report management. - Delivered a working prototype demonstrating the company's brand identity and digitised business operations.	Remote Jan 2026 - Mar 2026
Doklink Services Private Limited <i>Full Stack Developer Intern</i> - Contributed to a healthcare mobile application displaying nearby hospitals and real-time bed availability. - Developed backend REST APIs for authentication, hospital listing, and bed booking using Django REST Framework and PostgreSQL. - Gained hands-on exposure to production operations, including Docker containers, Nginx configuration, and log-based troubleshooting.	Kolkata, India Jun 2025 - Aug 2025

Projects

ChatterBox - Real-Time Chat Application - Built a real-time chat application allowing users to exchange messages instantly without refreshing the page. - Used WebSockets over TCP to maintain a persistent connection between the browser and the server, avoiding repeated polling for new messages. - Stored users, chats, and messages in PostgreSQL, with online and offline presence tracking.	2026
FloatChat - Ocean Data Question Answering - Developed a web application that answers plain-English questions about ocean sensor readings with data tables and maps. - Converted natural language questions into SQL queries, validated them before execution against a PostgreSQL database, and rendered the results as charts.	Sep 2025 - Nov 2025
AUKTAVE 2K26 - College Fest Website - Built the official website for the university tech fest with event pages, schedules, and an online registration form using Next.js. - Deployed and maintained the site throughout the fest, handling traffic spikes around event announcements.	2026

Research & Publications

Enhancing Human-Automated Vehicle Interaction in Complex Environments Using Virtual and Extended Reality Technologies 2026

- **Authors:** Priyan Malakar, Nirmalya Mandal, Mohammed Saad, Abhishek Mukhopadhyay
- **Published In:** *Practical Applications of Smart Human-Computer Interaction*, IGI Global Scientific Publishing, pp. 237-274

Evaluating Pedestrian Trust and Decision-Making Across eHMI Modalities in Indian Traffic Using Virtual Reality ICDSNE 2026

- **Authors:** Abhishek Mukhopadhyay, Priyan Malakar, Mohammed Saad, Nirmalya Mandal, Vinay Sharma
- **Status:** Accepted for ICDSNE 2026

Certifications

- **The Web Developer Bootcamp** - Udemy (Colt Steele)
- **Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp** - Udemy (Krish Naik)

Achievements

- Secured **2nd Place** in the Amitron Internal Hackathon at Amity University Kolkata.
- Built and deployed multiple web and mobile applications on Linux servers, including domain and DNS configuration, HTTPS setup, and production troubleshooting.
