

Role Code:	Service Reliability Engineer		
Job Family:	Service	Discipline:	All
Role Title:	Service Reliability Engineer	Typically reports to (role):	Manager/ Team Leader within Service Job Family
Roles that typically report to this role:	1 st Line Manager	Example job titles covered by this role profile:	

Purpose Of Role:

- ❑ 1st Line support for various Enterprise Discovery, Inventory, Service Mapping, Automation. Ensure queue management and handle incidents that are escalated by the Level 1 team for both system generated events and user related queries. Ensure fault resolution and escalations are handled in a timely manner.

Key Responsibilities:

- ❑ **Basic Networking Concepts like** OSI model, TCP/IP (Logical Link Control, Flow Control, Link Negotiation)
- ❑ IP Addressing and Subnetting. Bridging and Switching Concepts, LAN Technologies such as Ethernet - CSMA/CD STP, RSTP, MSTP, VLAN tagging, LACP.
- ❑ Good Knowledge in Routing concepts like: RIP, OSPF, IGRP, EIGRP, BGP. Knowledge in VRRP, HSRP, GLBP
- ❑ Good Knowledge on Networking Layers, Core, Distribution and Edge Switches (3 Tier architecture).
- ❑ Good knowledge on WAN side protocols
- ❑ Working experience in implementation of Switching technologies such as Stacking, STP, VLANs, L2 , L3, 1G / 10G, Optic Fiber SFP/SFP+, etc.
- ❑ **Working experience in implementation of Cisco / Equivalent Routers with functions such as Load balancing, WAN failover, MPLS, Site to Site VPN, Router HA, etc (Desired).**
- ❑ Good working knowledge of Application layer protocols and functions such as IP, ARP, ICMP, TCP, UDP, DNS, SNMP, TFTP, FTP, HTTP/HTTPS , BootP
- ❑ Basic Ethernet Concepts and Cabling, , Device authentication mechanisms, User Authentication Mechanisms, SMTP etc.
- ❑ Ability to co-ordinate and interact with various teams to arrive at a quick resolution and organize workload for effective implementation.
- ❑ Ability to interact effectively at all levels with sensitivity to cultural diversity

Business Impact:

- ❑ N/A.

Authority/Decision Making:

- ❑ N/A.

Qualifications:

- ❑ College degree or equivalent Technical Training.
- ❑ Typically requires 1-3 years relevant experience.

Skills/Experience:

- ❑ **CCNP certificate in Routing & Switching** (Desired)
- ❑ **Good Communication skills, be an active listener**, quick ability to diagnose the customer pain area.
- ❑ Ability to Socialize and Network with Customers and Vendors.
- ❑ Implement a change in accordance with change plan.
- ❑ Good Communication skills, be an active listener, quick ability to diagnose the customer pain area.

Information Security Responsibilities:

- ☐ Adherence to information security under Information Security Directive and acceptable use policy
