Summary

Computer Science undergraduate who builds web and mobile applications and enjoys the part that comes after the code is written - putting an application on a Linux server and keeping it running. Comfortable with Nginx as a reverse proxy, DNS records, HTTPS certificates, ports and firewall rules, and reading logs to work out why a request failed. Keen to learn networking and service operations properly in a structured team, and used to explaining technical problems in simple language to people who are not developers.

Skills

Networking & Systems: TCP/IP, HTTP/HTTPS, DNS, SSH, SSL/TLS, WebSockets, Nginx (reverse proxy), Linux, Docker, ports and firewall basics

Programming Languages: JavaScript, TypeScript, Python, C++, SQL

Web & Mobile: React, Next.js, Node.js, Express.js, Django, React Native

Databases: PostgreSQL, MongoDB, Redis

Tools: Git, Linux command line, Postman

Education

Amity University Kolkata

Bachelor of Technology in Computer Science and Engineering - CGPA: 8.01 / 10

Kolkata, India

2023 - 2027

East West Model School, Talit

Higher Secondary (ISC Board) - 85.4%

Talit, India

2023

Secondary (ICSE Board) - 85.67%

2021

Experience

Modern Mahal

Full Stack Developer

Remote

Jun 2026 - Jul 2026

- Built an internal web tool for a glass business to record customer orders and follow them through production.
- Added login with separate access levels for staff and admin, and a page that generates price quotations.
- Put the application on a Linux server, set up Nginx as a reverse proxy, added the DNS records for the domain and enabled HTTPS.

Doklink Services Private Limited

Full Stack Developer Intern

Kolkata, India

Jun 2025 - Aug 2025

- Worked on a mobile app that shows nearby hospitals and how many beds are currently free.
- Helped build the backend REST APIs for login, hospital listing and bed booking, using Django and PostgreSQL.
- Learned how a live application is run day to day - Docker containers, Nginx in front, and checking server logs when a request failed.

Projects

ChatterBox - Real-Time Chat Application

2026

- A small chat app where two users can send messages to each other and see them appear instantly, without refreshing the page.
- Used WebSockets over TCP so the connection between the browser and the server stays open, instead of the browser asking for new messages again and again.
- Stored users, chats and messages in PostgreSQL, and showed whether the other person is currently online.

FloatChat - Ocean Data Question Answering

Sep 2025 - Nov 2025

- A web app where you type a question about ocean sensor readings in plain English and get back a table and a map.
- The question is converted into an SQL query, run against a PostgreSQL database, and the result is drawn as a chart.

AUKTAVE 2K26 - College Fest Website

2026

- Website for the university tech fest with event pages, schedules and a registration form, built with Next.js.
- Deployed it and kept it online through the fest, when most of the traffic arrived in a few short bursts.

Research & Publications

Enhancing Human-Automated Vehicle Interaction in Complex Environments Using Virtual and Extended Reality Technologies 2026

- **Authors:** Priyan Malakar, Nirmalya Mandal, Mohammed Saad, Abhishek Mukhopadhyay
- **Published In:** *Practical Applications of Smart Human-Computer Interaction*, IGI Global Scientific Publishing, pp. 237-274

Evaluating Pedestrian Trust and Decision-Making Across eHMI Modalities in Indian Traffic Using Virtual Reality ICDSNE 2026

- **Authors:** Abhishek Mukhopadhyay, Priyan Malakar, Mohammed Saad, Nirmalya Mandal, Vinay Sharma
- **Status:** Accepted for ICDSNE 2026

Certifications

- **The Web Developer Bootcamp** - Udemy (Colt Steele)
- **Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp** - Udemy (Krish Naik)

Achievements

- Secured **2nd Place** in the Amitron Internal Hackathon at Amity University Kolkata.
- Built and deployed several web and mobile applications on Linux servers, including domain and DNS setup, HTTPS certificates, and everyday troubleshooting.
- Often the person classmates come to for help setting up their environments and fixing deployment problems, which has made me comfortable explaining technical things simply.
